## **Restore the Past**

Breathe new life into traditional architectural styles with authentic textures and colors. In neighborhoods where homes are nestled close together, rich color combinations project a sense of pride and strength, ensuring your home stands out. The combination of CedarBoards horizontal clapboard and Cedar Impressions Perfection and Half-Round Shingles imparts texture and detail to this Victorian bed and breakfast and provides for a virtually maintenance-free lifestyle.

## Home on the Range

There's plenty to do on the farm. With CertainTeed products, exterior maintenance is one chore that won't be necessary. Install Triple 3-1/3" InvisiVent soffit for the ventilation you need, and the beautiful wood look you want. Frame windows with wide lineal trim, or create handcrafted wood accents along roof lines and above windows with Restoration Millwork boards. Restoration Millwork woodgrain finish is also perfect for designing distinctive balcony pillars and framework.

# **Siding Color Palettes**

## Start with a Big Splash!

No single element of your home's exterior has a more profound impact on its overall look than siding. CertainTeed offers over 40 color choices for this important part of your home's design.

From cool or warm hues, as well as blends and stains, choose one of these siding color palettes that best reflects what you want for your exterior personality. Once you dive in with your siding choice, the next step is selecting accent and trim colors. For these elements you can stay within your color palette or combine with another color palette to create your vision – it's up to you. Use the color trends and tools, as well as the six basic color combination principles on the following pages, as your guide.

# **Find Your Perfect Color Mix**

## { color trends and guide }

There is only one rule in home exterior design: There are no rules. Designers are using every conceivable color combination (as well as mixing siding textures and styles) to create distinctive exterior designs with a modern sensibility. You can do the same thing with your home. The optimum color blend has the power to bring out the best features of your home while disguising its flaws. A mix of dark and light colors can accentuate interesting architectural elements, while a mix of similar colors can tone down awkward areas. Bright tones can make a home seem larger or call attention to a feature, while darker tones can make a home appear to recede. Whatever your color goal is, CertainTeed can help you reach it.

## **Trends from the experts**

#### **Strong Colors**

20

Architects and designers are increasingly making use of dark colors for exterior walls. Darker roof colors harmonize with deep blues, greens and browns for quiet drama that adds stability. A more neutral roof color allows a strong siding color to stand out and really showcase your home.

#### Dark Trim

Dark trim colors work well to frame a home, outlining architectural details, windows or doors. When you use dark trim, choose a roof color that matches or is a shade lighter than the trim to produce an anchored, coordinated appeal. When using high contrast trim, it's important to balance its location on the home; it should not dominate any one area.

#### **Multiple Colors**

The use of two or more exterior wall colors with varied trim colors is part of a trend seen around the country. Secondary colors (also known as accent colors) are used within gables or on additions in most cases. On the safe side, you can mix two colors from the same color family. If you choose to mix color families, consider using one neutral color and be sure to keep in mind the roof color. Two strong siding colors can be combined, but we suggest you use CertainTeed's visualization tools to get a better idea of whether the colors work well together.

"We had a great time exploring all the product and color possibilities offered by CertainTeed and are thrilled with the final combination. It fits our home perfectly."

Roofing: Landmark in charcoal black

Siding: Cedar Impressions Double 9" Staggered Rough-Split Shakes in granite gray and Monogram Double 4" Clapboard in glacier blend

Trim: Vinyl Carpentry in sterling gray

This home has a cool theme (selection of cool grays), but it also has a subtle theme because these grays have similar color intensity and value.

#### Roofing: Landmark in resawn shake

Siding: Cedar Impressions Double 9" Staggered Rough-Split Shakes in natural clay and Cedar Impressions Double 6-1/4" Half-Round Shingles in ivy green

Trim: Restoration Millwork in sable brown\*

Corner Trim: Cedar Impressions matching mitered corner in natural clay

This home has a warm theme with a cool accent (green), and the colors are stronger than a typical home.

## **Trim Color Combinations**

Traditional white trim accentuates windows cleanly with any color siding, as shown below. Other options (left) include a more subtle combination, with trim and siding closer in hue and intensity; or a reversal of dark trim with light siding as a powerful way to frame your home.

# **COOL AND FRESH**

Blues, greens and cool grays create the peaceful look of calm water under a clear sky. They work especially well in northern and coastal areas where natural light changes more dramatically with the seasons. Trim in a cool neutral tone (for example, charcoal gray or sterling gray) provides an attractive counterpoint to more colorful siding – think pacific blue, forest or spruce.

# WARM AND INVITING

Colors like red, yellow and brown are a good choice when you want to highlight distinctive exterior features. These warm tones evoke the glow of summer and give your home a welcoming feel. Monogram blends and WeatherBoards stains are available in these tones, calling to mind the natural beauty of fresh-cut wood. Warm tans and grays make excellent accents. Trim in darker shades (autumn red, terra cotta, mountain cedar) adds a nice contrast.

This home shows warm tones accented with natural white Restoration Millwork trim: Cedar Impressions Triple 5" Perfection Shingles in buckskin with accents of Half-Round Shingles in autumn red and buckskin. Finishing the look are brown shutters and roof, tan door and red brick steps.

Light siding with white trim is a subtle use of color. This home features Carolina Beaded siding in desert tan with Restoration Millwork trim in natural white and Vinyl Carpentry trim in white for an understated feeling.

## SUBTLE AND CALM

If your home's exterior has a lot of design elements, closely related colors will unify and simplify its appearance. A monochromatic approach – based on different shades of the same color – will have a similar effect. The color palette can be either cool (pewter walls, oxford blue gables, pacific blue trim) or warm (buckskin walls with savannah wicker trim); the idea is to limit contrast for a relaxed vibe. Mixing cool and warm colors with similar intensity also works well.

# **CRISP AND EXCITING**

Homes with simple designs gain a pleasing complexity when contrasting, but complementary, colors are used. Interesting architectural features make a stronger impression when set off from the primary wall color. A dark roof paired with walls in a lighter color like marigold adds visual distinction; add dark trim – autumn red, for example – and your home will really pop. Dark siding with bright trim is another approach.

Cedar Impressions Straight Edge Rough-Split Shakes in terra cotta and Monogram Double 4" Clapboard in spruce are a rich color and style combination for this Arizona home.

# **STRONG AND BOLD**

Get in tune with current trends by choosing darker colors for exterior walls. Rich shades of brown, green and red add drama while also making your home appear smaller, a good thing for a large structure on a tight lot. Deep siding hues serve as visual grounding for a variety of strong trim colors and also work well for accenting recessed areas.

# **LIGHT AND CAREFREE**

Light colors add volume and interest to smaller homes, and soften sharp edges. Homes set back farther from the curb appear to move forward with a color palette that leans to the lighter end of the spectrum. Whether you favor warmer siding tones like sandpiper or desert tan, or cooler hues like silver ash or bermuda blue, the key is to create a pleasing blend of soft and muted tones.

### **Products**

### **First In Performance**

All CertainTeed siding, soffit and trim products have been designed to set the industry standard and continue to lead the way. From exclusive easy-toinstall designs to windload performance, impact resistance and durability, CertainTeed has thought of everything to help ensure that your home will look great for many years. With our lifetime limited warranty for our vinyl and polymer siding lines, you can be certain that the products you select will hold up through the toughest conditions.

### Styles

### **First In Style**

CertainTeed offers the widest variety of siding styles in the industry, with 18 distinct horizontal profiles, 7 distinct vertical styles and 15 unique textures across our siding lines. Each has a unique look based on designs common to diverse geographic areas and historical periods.

CertainTeed was the first to produce siding utilizing a direct transfer system from real cedar boards for natural TrueTexture<sup>™</sup> finishes. Add Vinyl Carpentry and Restoration Millwork decorative trim products and you can give your home the look of true wood craftsmanship with virtually maintenance-free materials.

### Colors

#### First In Color with Lifetime Fade Protection

CertainTeed offers an industry-leading spectrum of colors including unique darker shades and semi-transparent stained blends for virtually unlimited design possibilities. Utilizing the PermaColor™ System CertainTeed guarantees Lifetime Fade Protection on our vinyl siding, as well as impact resistance and durability.

### **Sustainability**

### CertainTeed respects the environment through the responsible development of sustainable building products and systems.

Builders, contractors and manufacturers continue to look for ways to reduce our industry's impact on the environment while meeting customer demand for products that deliver beauty, comfort and performance. CertainTeed's commitment to these goals is reflected here, highlighting our ongoing effort to become the preeminent supplier of green building materials.

GreenCircle Certified, LLC provides third-party verification of sustainable aspects of products and manufacturing operations. GreenCircle Certified provides assurance to builders, regulators and consumers that products labeled with the GreenCircle mark have undergone a rigorous audit process that verifies compliance with the environmental and sustainability claims of the manufacturers. The life cycle assessment of CertainTeed siding products can contribute to earning points for green building certification in both the USGBC and NGBS green building programs.

In the NGBS (National Green Building Standard), points can be earned for using LCA data to select more environmentally preferable products. For LEED v2009, LEED Pilot Credit 52 provides a Material Disclosure Credit for selecting products with published and third-party verified LCA's. LEED v4 also contains a materials and resources credit which gives credit to projects that select products with publicly available, critically reviewed LCA's. CertainTeed was the first siding and exterior trim manufacturer to submit life cycle assessment data to BEES (an online LCA tool developed by the National Institute of Standards and Technology) for third party verification and publication. Life Cycle Assessments not only assure our customers that they are purchasing a sustainable product, but also sets a baseline for our continuous improvement.For complete study information go to www.certainteed.com/lca

### **Color Tips**

- 1. Look for color palette ideas in your surroundings, including landscaping, trees and gardens in your neighborhood and the larger area where you live. The colors you pick for your interior walls can also influence your exterior walls.
- 2. You may be inspired by your neighbors' color schemes, but it is a good idea to avoid copying them exactly and best to create your own unique combination that sets your home apart. In most cases, you want your home to fit in but not clash with nearby buildings.
- 3. You need to first consider the appearance of any features on the home that will remain unchanged and harmonize your siding color with them. This includes roofing, masonry, stone, stairways, doors, etc.
- 4. If your home's architectural style is very distinct (Colonial, Greek Revival, etc.) you will get best results if your color selection and treatment complements its original design.
